

VELOE

Veloe® multi lungo Bosch Cargoline

Veloe® offers a wide selection of accessories, from practical add-ons to stylish upgrades, designed to meet every rider's needs. The Veloe® multi lungo comes equipped with accessories specifically designed for kids and cargo. Whether for safety, comfort, storage, or carrying, each accessory is crafted exclusively for Veloe®.

PERSONALIZE YOUR VELOE® MULTI LUNGO

Powered by the reliable Shimano EP6 mid-engine, the Veloe® multi lungo Shimano EP6 delivers consistent performance, making it ideal for daily errands, school pick-ups, and weekend adventures.

SHIMANO EP6

With rapid acceleration, the Veloe® multi lungo Bosch Cargoline offers a convenient and efficient solution for everyday transportation. Its reliable performance ensures smooth rides, making it the perfect choice for daily commuting.

BOSCH CARGOLINE

**Veloe® multi lungo
A LONGTAIL STORY**

Veloe® meets the expectations of its riders. Out of our rider research, families with two or more children are in need of a longer rear rack. Still, we wanted to offer a compact cargo eBike. The frame of Veloe® multi lungo is different with focus on stability, strength and comfortable riding.

Veloe® multi lungo rides like a normal eBike. In comparison with a longer cargobike, the turning radius is smaller and results turn out to be more fun in riding experience and definitely safer in city environments.

From riding experience to durability: the reason why people #rideveloe is because of its functionality. Families prepare their kids in enjoying riding a bike. When they later on do, parents still have an awesome eCargobike, called 'multi lungo' facing the hassle of cities and transport groceries and daily cargo load.
